Education

Pimpri Chinchwad College of Engineering, Pune
Bachelor of Technology in Computer Engineering

Aug 2023 – June 2027
CGPA: 9.03/10

Relevant Coursework

Data Structures	Algorithm Analysis	Software Methodology
Object Oriented Programming	Database Management	Computer Networking

Projects

Pune House Price Prediction System || *HTML, CSS, JavaScript, Flask, PostgreSQL* [GitHub](#)

- Engineered a robust Flask-based predictive analytics platform to estimate housing prices using advanced Scikit-learn regression models.
- Architected a Vastu-compliant chatbot leveraging a structured JSON knowledge base to deliver spatial and directional property advice.
- Integrated secure user authentication dynamic, role-based dashboards using Flask-Login and PostgreSQL to enhance UX and data control.

Library Management System || *HTML, CSS, JavaScript, MySQL* [GitHub](#)

- Developed a full-stack web application with a modular, responsive UI for seamless library operations such as cataloging, issuing, and returns.
- Optimized database queries for real-time availability tracking and enhanced search operations.
- Enabled mobile-first UX and adaptive design principles to improve system accessibility across devices.

Register Allocation using Graph Coloring || *Compiler Design, Graph Theory, Algorithms, Python* [GitHub](#)

- Architected interference graph construction and executed a greedy graph coloring strategy to achieve efficient and scalable register allocation.
- Mitigated register spill through refined variable-to-register mapping, thereby elevating execution efficiency and computational performance.
- Optimized memory access patterns by leveraging advanced compiler optimization techniques, reducing redundant load/store overhead and enhancing overall system throughput.

Portfolio

Personal Portfolio Website [Visit Website](#)

- Presents end-to-end project implementations with detailed system architecture, technology stack breakdown, and deployment pipelines.
- Integrates live demonstrations, version-controlled repositories, and competitive programming accomplishments within a responsive, production-ready design.

Technical Skills

Languages C++, C, Python, Java, R	Databases MySQL, MongoDB, PostgreSQL
Web Technologies HTML, CSS, JavaScript, Flask	Tools VS Code, GitHub

Coding Platform Profiles

[LeetCode](#) | [Codeforces](#) | [CodeChef](#) | [HackerRank](#)

- Solved 400+ problems on Data Structures & Algorithms and participated in 20+ contests across coding platforms.
- Achieved Global Rank 7,445 in Meta Hacker Cup 2024 Round 1 and Secured Global Rank 280 in CodeChef Starters 166 (Dec 2024).

Position of Responsibility

CodeChef PCCOE Chapter Aug 2024 – Oct 2024
Competitive Programming Executive Member

Microsoft Learn Student Chapter - PCCOE Oct 2024 – July 2025
Competitive Programming Executive Member
